

Synqed Air — Investor Outreach Kit

Everything needed to run a pre-launch raise before the Dec 31 launch.

1. Target List

Match the ask to the stage. Pre-launch, no-revenue rounds fit angels and micro-funds far better than tier-1 VCs right now — 2026 African VC activity has consolidated into fewer, larger, later-stage checks, so early-stage generalist funds are a harder door than they were two years ago.

Priority 1 — Angel networks & micro-funds (best fit, \$10–50K checks)

- African Business Angel Network (ABAN)
- LoftyInc Capital
- GetFundedAfrica
- Individual angels from your own SynqedAI network — founders/operators you already know who write personal checks

Priority 2 – Diaspora professional networks (your actual future customers)

- Nigerian/African professional associations abroad (US, UK, Canada)
- Alumni WhatsApp/Slack groups, diaspora investment clubs
- These checks are smaller but come with instant word-of-mouth distribution – treat them as investors *and* first users

Priority 3 – Travel-focused investors

- Renew Capital (Africa-focused, has backed travel-sector startups)

Priority 4 – Larger funds (seed intros for later, not this round)

- Partech Africa, TLCom Capital, 4DX Ventures, Norrsken22, Novastar Ventures, Founders Factory Africa
- Don't lead with these for a pre-launch SAFE – but a warm intro now, with a promise to circle back at launch with traction data, plants the seed for your next round.

Action: verify current contact partners and check sizes for each before outreach – fund focus and staffing shift, and this list wasn't built from live scraping of each firm's site.

2. Email Templates

A. Warm intro request (to a mutual connection)

Subject: Quick intro to [Investor Name]?

Hey [Name],

Hope you're well. I'm raising a small pre-seed round for Synqed Air — an AI-native flight booking app for Africa's diaspora corridors (transparent all-in pricing, WhatsApp human support, AI travel companion). We're live at synqedair.vercel.app now, with the app launching Dec 31.

I saw you're connected to [Investor Name] — would you be open to a quick intro? Happy to send a one-pager you can forward along.

Thanks either way,
Perez

B. Cold outreach (direct to investor)

Subject: Synqed Air — AI flight booking for the diaspora corridor, raising pre-seed

Hi [Investor Name],

I'm Perez, founder of Synqed Air — an AI-native flight booking app built for Africa's diaspora corridors. We fix what generic booking tools get wrong for this traveler: hidden fees at checkout, bot-only support, and route coverage that ignores the corridors diaspora travelers actually fly.

We're live in preview at synqedair.vercel.app, app launching Dec 31. I also co-founded SynqedAI, an AI automation agency already shipping products for enterprise clients — this is a team with a live shipping track record.

Raising a small pre-seed SAFE to close before launch. Would you have 20 minutes in the next two weeks?

One-pager attached.

Best,

Perez Azazi

Founder & CEO, Synqed Air

C. Follow-up (no response after ~5-7 days)

Subject: Re: Synqed Air — AI flight booking for the diaspora corridor

Hi [Investor Name],

Following up in case this got buried — still moving fast toward our Dec 31 launch and would love to get

you the full picture before the round closes.

[One new proof point since last email – e.g. waitlist number, a new LOI, a product update]

Let me know if a quick call makes sense.

Perez

3. Objection Handling

"You have no users yet."

→ Point to the live preview, the waitlist number, and any LOIs/deposits. Reframe: you're not asking them to bet on an idea, you're asking them to fund the last mile before a dated, committed launch.

"How is this different from Wakanow / Kayak / Skyscanner / Google Flights?"

→ None of those are built around the diaspora corridor specifically: full-price transparency at checkout, WhatsApp-speed human support, and a travel companion that handles visas/weather/check-ins for travelers who fly these specific routes. Have one concrete corridor example ready (e.g. Lagos–Nairobi pricing/support gap vs. incumbents).

"What's your distribution / CAC channel?"

→ Lead with what's real: SynqedAI's existing LinkedIn/Substack audience, diaspora community

and alumni networks, and word-of-mouth from the WhatsApp-support model itself. Avoid vague "organic + paid" answers — investors will push on this.

"African travel/consumer startups are a tough category right now."

→ Acknowledge it directly, then reframe: 2026 capital is shifting toward logistics, mobility, and infrastructure plays away from pure fintech — you're positioned inside that shift, not against it.

"What happens if you don't hit the Dec 31 launch date?"

→ Have a real answer ready before this comes up — what slips, what doesn't, and what the fallback timeline looks like. Investors read a founder who's already thought about slippage as more credible, not less.

4. Data Room Checklist

Have these ready to share the moment someone says yes to a call:

- [] Pitch deck (13 slides — already built)
- [] Investor one-pager (built — see companion file)
- [] Live product link (synqedair.vercel.app) + demo video/screen recording of the app flow

- [] Traction sheet – waitlist count, WhatsApp inquiries, LOIs/deposits (start tracking now)
 - [] Cap table (current ownership split across founders)
 - [] SAFE template / terms (round size, valuation cap, discount)
 - [] Team bios – Perez, Emmanuel Onyia (COO), Henry Erigbe (CTO), with relevant execution history
 - [] Lightweight financial projections (12–24 month) – needs real assumptions on pricing/take-rate/volume; flag this as the one item to build next with actual inputs
 - [] Corridor market note – remittance/diaspora scale, competitive gap (draft language is in the one-pager's "Why Now" section)
 - [] Incorporation documents
-

5. Waitlist Copy – Replace the Dead App-Store CTAs

The current site links "Download for iOS/Android" to nothing, since the app isn't live until Dec 31. Swap that section for a capture form until launch:

Headline option A:

Be first through the door.

Join the waitlist and get early access before we open to everyone — plus a launch-week fare credit.

[Join the waitlist →]

Headline option B:

The app launches Dec 31. Your seat doesn't have to wait.

Drop your email or WhatsApp number and we'll notify you the moment it's live — early joiners get priority access.

[Get early access →]

Capture at minimum: email (required) + WhatsApp number (optional, doubles as a support-channel signal for investors). Every signup is a number you can put directly into the "Traction" section of the one-pager.
